Chapter 0: Good Practice.....	9
Chapter 1: How to create a kitchen with 3D Warehouse components....	11
1.1 Create a 3D model from a 2D layout	13
1.2 Drag and drop cabinets of different sizes, select door styles and Finishes	17
1.3 Use a 3D Warehouse component and make changes to it to make it suitable for your project	22
1.4 Create a new element, sample the material and create a new group	29
1.5 How to use section planes to reach the interior of a room and save scenes for ulterior use	32
1.6 How to create a backsplash	38
1.7 How to insert wall cabinets	45
1.8 How to create a rosette appliqué using a picture as a texture	51
1.9 How to create a crown molding for the kitchen cabinets	58
1.10 Fillers and toe kicks	62
1.11 Interact Tool	64
1.12 Tips to finish you model	65
Chapter 2: How to create a kitchen from pictures and images.....	69
2.1 How to prepare your images and create a material	71
2.2 Download the model from 3D Warehouse	74
2.3 Explore how the model is organized	75
2.4 Creating scenes for elevation views	76
2.5 How to apply textures to simulate door cabinets and appliances	78
2.6 How to create a wood grain from an existing image	82
Chapter 3: Plugins and Dynamic Components to customize your design	87
3.1 Cab by T. Track	89
3.2 Working with Layers using Cabinet Plugin by T.Burch and Dynamic Components	91
3.3 Inserting Wall Cabinets with Kitchen Plugin by R.Wilson	97
3.4 Inserting Dynamic Components and changing attributes of many components at the same time	101
3.5 Product Connect by Igloo	109
Chapter 4: How to create Dynamic Components.....	113
4.1 How to create a dynamic cabinet	115
4.2 How to create a list of different material options in a dynamic component	119
4.3 How to use a logical function to change the handle hand side	123
4.4 How to implement dynamic pricing	127
4.5 How to repeat a sub-component like a shelf and adjust the spacing in between	129
4.6 How to animate a dynamic component	134

Chapter 5: Matching models to Photos.....	141
5.1 How to take digital pictures	143
5.2 How to match the camera calibration to create a 3D model from a photo	144
5.3 How to use the matching process to create a 3D model	147
5.4 Matching models to photos	150
Chapter 6: Creating seamless and tiled materials.....	155
6.1 How to create a tiled material	157
6.2 How to create a seamless material	159
6.3 How to create a patterned texture	162
6.4 Mapping plugins	163
Chapter 7: Preparing your construction documents.....	165
7.1 Creating a new style and preparing your scenes	166
7.2 Configuring text settings	169
7.3 Leader Text	171
7.4 3D Text	174
7.5 Configuring dimension settings	175
7.6 Inserting dimensions	176
7.7 Changing settings from the Entity Info window	180
7.8 How to use Layout to insert dimensions and texts	182
Chapter 8: How to print and export your documents.....	187
8.1 Basic steps to print – Fit to page option	188
8.2 Printing to scale	192
8.3 Exporting a PDF file	198
8.4 Exporting image files (Microsoft Windows)	201
8.5 Exporting 2D DWG or DXF files	202
8.6 Printing from LayOut	203
8.7 Creating a PDF file in LayOut	205
8.8 Complete your drawing in LayOut	206
8.9 Other LayOut tools to get good results	207
Chapter 9: Tips to add some lighting effects	209
9.1 Non-cast shadows ceiling	210
9.2 Ceilings with transparent materials	213
9.3 How to use transparent materials to simulate light source projections	216
9.4 Adding glow properties in an image editor	218
